

To forget a network in Windows 8/10

1. Click on your network icon in the Taskbar.

2. Select “Network Settings”
3. Scroll down the Network & Internet page and select “Manage Wi-Fi settings” (If your version doesn’t look like this, skip this step)

4. At the bottom of the Manage Wi-Fi Settings page, under “Manage known networks” select the network you would like to forget and click “Forget”

Manage known networks
